About Us

CSP Training Centre is a fully independent professional training institution established in response to a growing market need to build sustainable capacity across all facets of developing Africa.

Born out of practical delivery experience and evolving regional demand, CSP Training Centre has matured into a standalone entity focused exclusively on leadership development, institutional strengthening, skills transfer, and capability building across public, private, and development sectors.

Our Origin and Evolution

While CSP Training Centre traces its origins to Cyber Security Projects, it now operates as an independent institution with its own governance, academic direction, and strategic mandate.

Our evolution reflects a broader continental need: moving beyond advisory interventions to long-term capacity development that empowers African institutions, leaders, and professionals to sustainably manage risk, governance, technology, and development challenges.
